Jupiter III SE

What makes these gloves the best in the world?

eska

- 1 Lightweight, fire resistant kermel material does not retain water and dries faster than leather.
- 2 Gloves will NOT harden or shrink after being exposed to water, direct flames or chemicals. Specially treated leather stays soft and flexible and allows for machine washing.
- 3 Liner will NOT pull out during the life of glove.
- 4 Thermodynamic Properties - Keeps hands cool in summer and warm in winter.
- 5 KEVLAR®/Silver Blend Liner provides heat and cut protection and is also anti-odor, anti-fungal, anti-static, and thermo dynamic.
- 6 CROSSTECH® Membrane blocks blood-borne pathogens, fluids, chemicals and water.
- 7 3-Dimensional Glove Pattern follows the natural curves of your hand to provide greater dexterity, fingertip tactility and overall comfort.
- 8 Silicone-Carbon coated KEVLAR® reinforcement on palm and knuckle is highly heat and cut-resistant and also anti-slip.
- 9 3M Scotchlite™ Reflective material improves visibility in adverse conditions.
- 10 Ultra Durable - This glove will last longer than any firefighter glove you have ever worn.
- 11 8 Sizes Available - XXS-XXXL
- 12 Exceeds NFPA 1971:2007 requirements for structural fire fighting.
